

Accessing Voicemail

From your phone, dial the voicemail number 844-423-1128 or press the vmail icon.

If your phone number is recognized, you will be asked to enter your service PIN (default PIN is 2468) or press "star" to enter another mailbox number.

Once your PIN is accepted you'll be presented with three options to choose from with your keypad

- 1** Message Center — to listen to new and saved messages, compose a message or recover deleted messages
- 6** Administer your account — to configure and record greetings, mailbox preferences and attendant features
- *** Exit the system — this can also be achieved by just hanging up the call

Keep in mind that ***** also takes you back to the previous menu while navigating the voicemail user interface

Message Center

Here you can listen to new, saved or all messages (options 1, 2 and 3), compose a message (4) and recover messages deleted during this call (5).

During message playback, you can perform multiple actions using your phone keypad:

After listening to a message you have the following options:

Compose a message

The Voicemail system lets you record messages and deliver them to one or more recipients. To do that, get to the message center (option 1 on the main menu) and select option 4: Compose a message.

The system will ask you to record your voice and press # when finished. After the message is recorded, you can select the following options:

- 2** Playback Recorded Message
- 3** Re-record Message
- 4** Mark Message as Private or High Priority
- 5** Select Recipients for Message
- 6** Schedule Future Delivery of Message
- *** Return to the Message Center Menu

Composing a message is a very useful feature when you want to leave a reminder to a colleague that needs to complete a task. You can set a future delivery date and a new voicemail will appear on his/her voicemail inbox on the designated date and time.

Administer Account

This menu branch lets you manage all your mailbox account options including::

- 2** greetings
- 4** mailbox preferences (including notifications)
- 6** attendant options (if you want to enable someone to manage your messages)
- 7** wakeup and reminder options
- 8** additional options (PIN change, groups, auto-login and prompt levels)
- *** You can press "star" to return to the main menu

Administer Greetings (2)

Selecting greetings will present you with a new menu press:

- 1** To administer **Primary Greeting**— choose a standard system greeting, a system greeting personalized with your name or a custom greeting recorded by you
- 2** To administer **Extended Absence Greeting** — this greeting option alerts callers that you are away and not able to responding to messages immediately.
- 3** To administer **Busy Greeting** — this greeting can supplement a Normal Greeting to alert callers that you are currently on the phone. Typically, users include a statement offering to respond more rapidly to the caller.

Mailbox Preferences (4)

- 1** **Message Ordering** — choose the order in which messages are played back. The options are: newest first, oldest first, by priority or by sender.
- 2** **Autoplay** — If enabled, the system will play messages immediately after logging in, rather than presenting menu options
- 3** **Envelope** — choose the level of information to be presented on the message envelope
- 4** **Sub Mailboxes** — Configure optional multiple mailboxes
- 5** **Notifications** — enable/disable notifications via Message Waiting Indicator (MWI) light, SMS/Text message, Phone Call, Missed Call, Email or Callback

Wakeup and Reminders (7)

Voicemail lets you setup wakeup calls and reminders. You can ring your own phone or another number. The Wakeup and Reminder menu has the following options:

- 1** **Wakeup** — enable and disable wakeup calls. Schedule a weekday and/or weekend wakeup call
- 2** **Reminder** — Schedule a one time, daily, weekday and/or weekend reminder. You can decide if you want the reminder to ring your own phone or another phone or if you just want a voicemail message to be deposited in a mailbox at a designated time
